

PetroSmart EZ™

# The **simple solution** for pay-at-the-pump controls.

**What is the focus of today's station operator?  
It's to offer efficient, quality fuel service to the public at a profitable price. Is this a complicated process? No! It doesn't have to be.**

Triangle MicroSystems, Inc. and Special Service Systems have combined their 34 years of fuel control and credit payment development and experience into a new pay-at-the-pump system. Tens of thousands of fuel controls and payment terminals sold by TMS and SSS are presently in use across the country, and are widely recognized for their consistent quality, high reliability, low maintenance, and service support. Now they have combined into a truly simplified product system, the PetroSmart EZ.

The PetroSmart EZ allows you to control up to 8 MPD's, and offers pay-at-the-pump, pre-authorization, pre-pay, post-pay, credit cards, and debit cards. Call us today for details on how you can make the PetroSmart EZ work for your installation.

#### PetroSmart EZ provides:

- Low cost
- High reliability with discrete components
- Remote downloading of program updates
- Full operational reports and data
- Easily understandable operator interface for quick training
- All operational reports printed through the payment terminal
- Lifetime warranty with the CircleNet® program
- Friendly, cooperative 24-hour, seven day a week help desk

## How PetroSmart EZ Works

Note: No other dispenser interfaces are required (PAM, PIC, D-Boxes, etc.).

## Customer Support and Service

It's important to know that PetroSmart EZ users have additional backup and support. Often problems that arise aren't the result of component failure, but simply questions pertaining to programming, operational and financial settlement issues. Isn't it nice to know that these concerns can be competently addressed and resolved through the CircleNet® 24/7 program.

Manned by a highly trained staff experienced in handling common questions posed by convenience store personnel, CircleNet will provide operator assistance and troubleshooting for both the PetroSmart EZ console and the PS1500 payment terminal. As part of the CircleNet program, the console and payment terminal have a lifetime product warranty.

**For further details call: Triangle MicroSystems, Inc., 1-800-334-5548  
Special Service Systems, 1-800-777-8981**

\*Fleet cards and EBT cards will be accepted at the dispenser third quarter, 2001.
