

## Mechanical to Electronic in just a couple of hours...

Upgrade most any lighted mechanical pump to a fully electronic head in just a couple of hours... Send prices and apply cash/credit pricing using most any POS or console compatible with electronic heads.

It's obvious to everyone because the sale and volume amount and price are all displayed clearly at all [VRR locations](#)... **Pump prices are updated in just a few keystrokes of the countertop controller!**

How many still send a man to each site to change prices? Do they get to do much more for you? Is there a better use for your tech's time? TMS and P&T Electronics have a solution to all this waste and confusion... The [VRR-100](#).

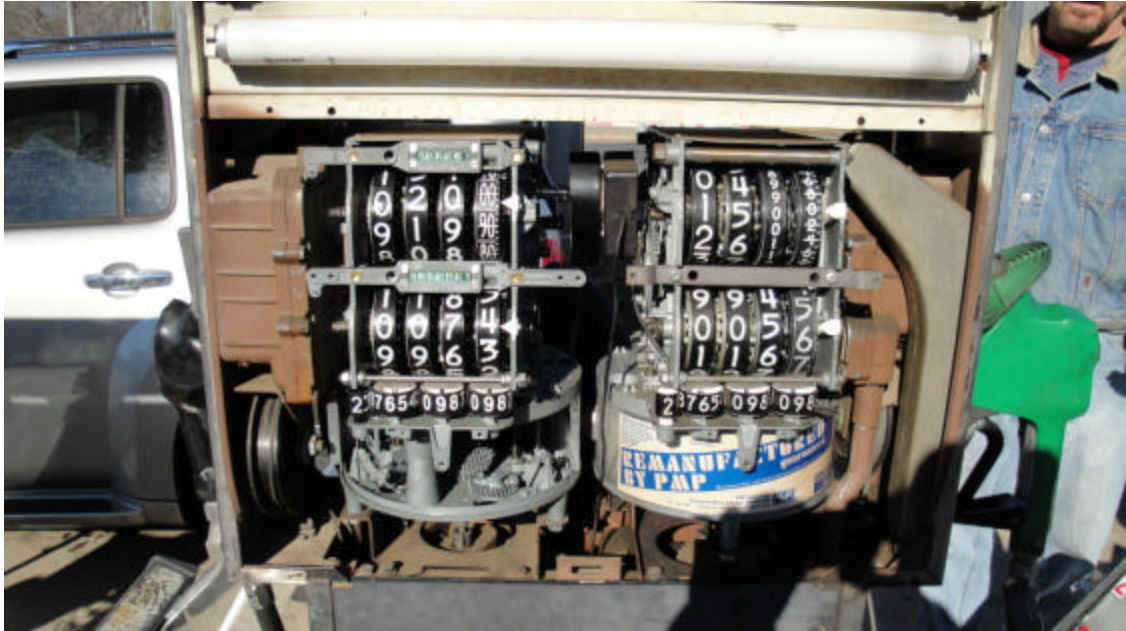

This one CPU board can "talk" like an electronic Gilbarco or Wayne head, and comes standard with electronic calibration. Once you go through the process, you'll wonder why you wasted all that time with those old computers...

## TMS and P&T Electronics

# Who wants unhappy customers?

In a recent email received there was a link to [4 pages from PMP Corporation telling how to change prices on a VR 10.](#) Not only is the VR10 difficult to change prices on, if the wrong step is made a new computer is required! The VR10 is confusing to customers at the island. The gears completely change during an upgrade, and what used to look like \$2 now represents \$20. How many \$2 sales happen at a store? How many times have the customers been shocked to find out they owe \$18 more than they thought?

The PMP site also provides [3 pages from PMP Corporation to put a \\$3 gear in a 2002e.](#) The industry has been through this change several times. Each time the price drops below \$3, the gears come out, and most times get lost or thrown away...

## Examine the short and long term value of using the VRR

Being highly accurate, and easier to change the PPU, the VRR will pay for it's self over time.

	<b>Mechanical Computer And Pulser</b>	<b><a href="#">VRR-100 Upgrade Kit</a></b>	<b>Used Or New Electronic Pump Or Dispenser</b>
<b>Upfront Cost</b>	\$977 (Pulser And Core \$359 Credit)	\$ 1550 Including New Powder Coated Faces	\$2400 to \$4800
<b>Life Expectancy</b>	0 to 2 Years	Up To 30 Years	0 to 30 Years
<b>Price Change</b>	Manual, Complicated, And Risk of Damage	Auto From Controller <b>No More \$3 Gears</b>	Auto From Controller
<b>Breaking Open Fuel Lines</b>	No Plumbing Work Required	No Plumbing Work Required	Risk Of A Leak After Install
<b>Accuracy</b>	+/- 3 cents	1/1000th of a gallon	1/1000th of a gallon
