

PRODUCT: BCS TIMEWATCH TWC

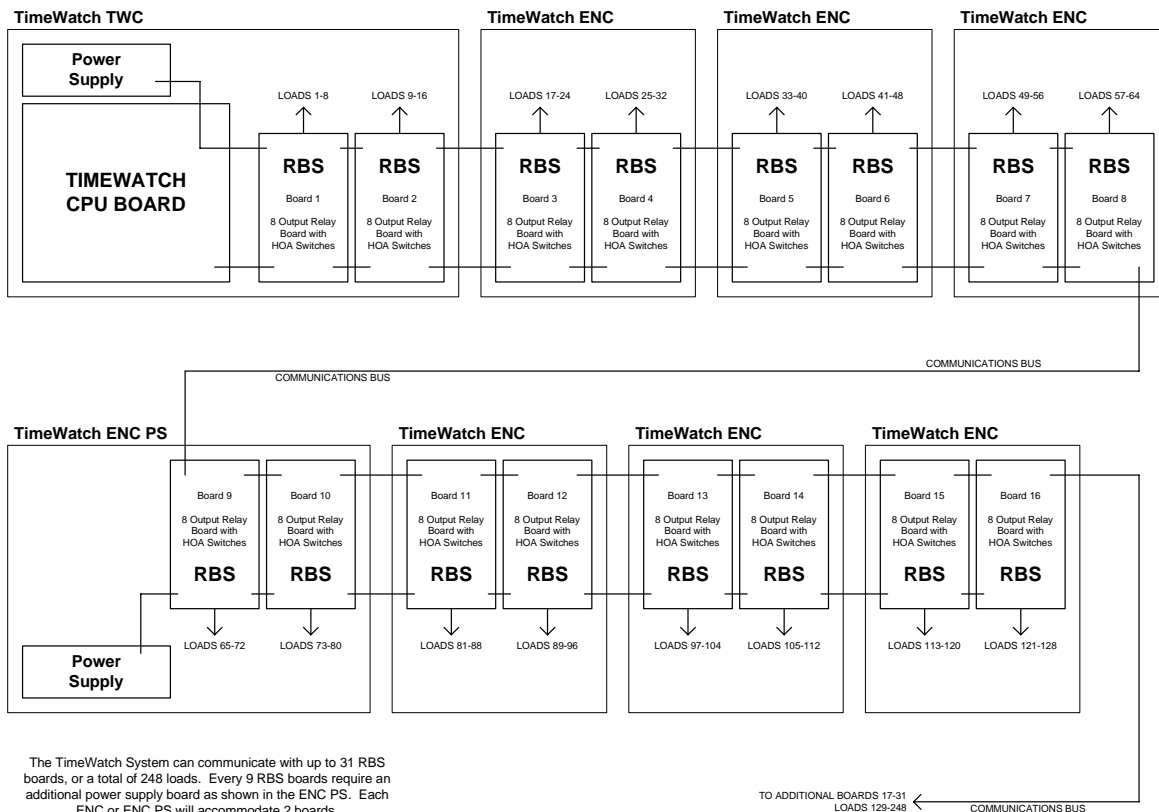

Product Configuration Overview

The TimeWatch system may installed as a stand-alone system in various configurations to meet the individual requirements of your facility.

The components of the TimeWatch system include:

- TimeWatch TWC** Main system controller (less output boards)
- TimeWatch RBS** Digital output board / 8 points with hand-off-auto switches
- TimeWatch ENC PS** Metal enclosure for two (2) TWC320 output boards – Includes power supply
- TimeWatch ENC** Metal enclosure for two (2) TWC320 output boards – No power supply

The system may be installed as shown below, with a maximum point total of 248.

As shown above, the system installation may utilize various enclosures for mounting of the output boards. These enclosures allow mounting of output boards next to the required loads, eliminating long cable runs. One power supply, as found in the TWC main controller or ENC PS enclosure may power up to 8 RBS digital output boards.

System Invoicing

The TimeWatch system will automatically generate invoices for billing of override usage. These invoices will reflect all override activity by tenant and individual code.

The invoice is designed with proper spacing for printout on owner or management letterhead, or any additional custom pre-printed form.

Example of a typical TimeWatch Invoice, printed on standard customer letterhead:
